MRV systems and global standards

- **About 50% of Japan's total emissions are measured and reported** through the Mandatory GHG accounting and reporting system under the Act on Promotion of Global Warming Countermeasures
- **Corporate Governance Code** states companies **listed** on the Prime Market should **collect and analyze data on the impact of climate-change risks and opportunities** and enhance the quality and quantity of disclosure **based on the TCFD Recommendations** (or an equivalent framework.)
- **Global standards** help companies to communicate information

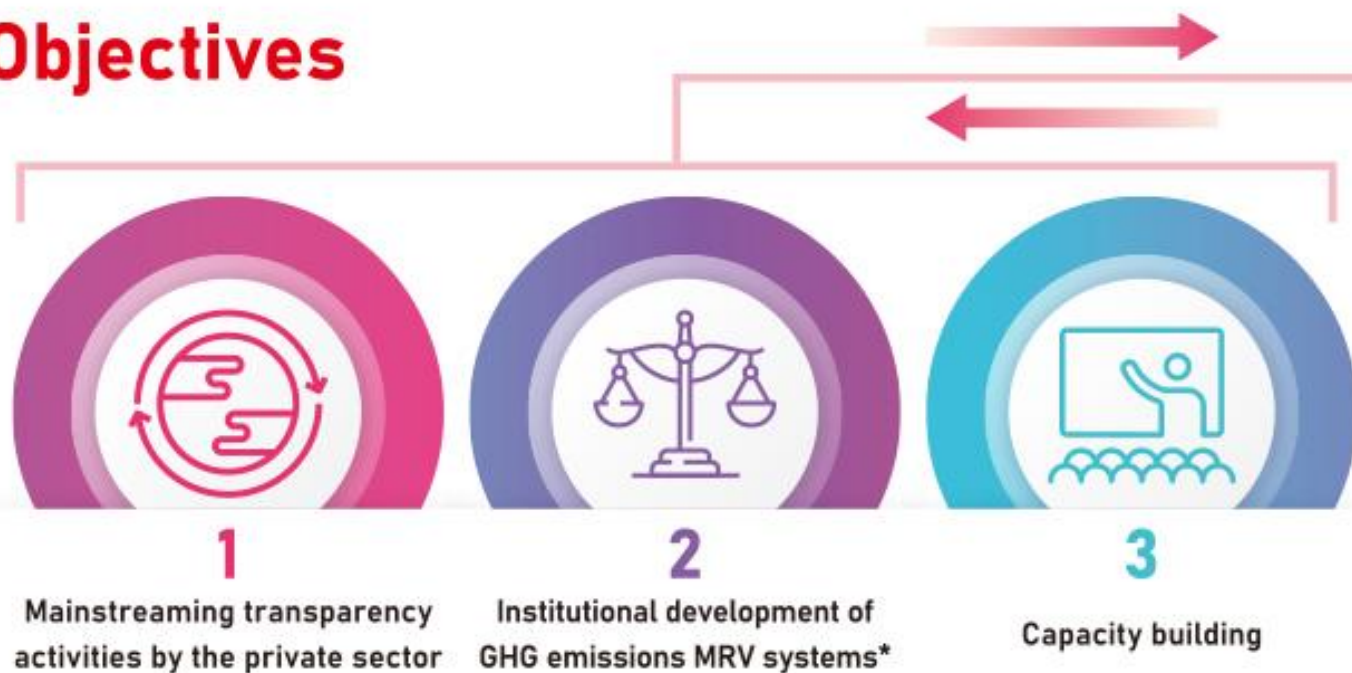

GREENHOUSE
GAS PROTOCOL

Climate related information disclosure can attract investments

- Financial institutions/investors want emission data in their portfolio
- Transparency of GHG emission is the base for investments

PaSTI Objectives

*Measurement, Reporting and Verification systems

Incentives

ESG Investments

Corporate value improvement etc.

PaSTI promotes transparency of the private sector which leads to ESG investments and increasing the competitiveness of companies in the global market.

ASEAN project

Bilateral cooperation

Viet Nam

- Support making Circulars for Decree on greenhouse gas emission mitigation and ozone layer protection (No.6/2022/ND-CP)
- Green finance workshop to be held

Philippines

- Utilizing the Sustainability Reporting System of the Securities and Exchange Commission to collect GHG emissions data

Thailand

- Making automatic calculation sheets for GHG emissions from the waste sector
- Thailand's ESG investment cases are shared across ASEAN

By strengthening transparency,
let's mobilize sustainable finance!
